

18th Dr E Vaithilingam Memorial Scientific Session
The Imaging Conference 2k19

IDEAS TO REALITY

For the next step in eye care

The concept of "Ideas to Reality" was created to leverage technology in eye care that will help to develop new models in patient care, optometric education and patient communication in the future.

Participants can submit a proof of concept or a prototype containing innovative **Ideas** that can be changed to a **Reality** with an expert trace. It gives an opportunity to form an incredible network at Sankara Nethralaya and interact with the team of expert ophthalmologists, optometrists, some of the leading engineers and scientists from other institutions around, for a brainstorming session.

HURRY! Submit your entries now in the website under the contests tab

Deadline: December 31, 2018
