

# Model Making Contest

**get it right!** ✓

The conception of 'Model making contest' for The Imaging Conference 2k19 is intended to discover innovative and inventory ideas that will serve as the stepladder towards designing "**Screening methods in eye care practice**"

This session invites participants to exhibit their creative prototype/working model that can screen for ocular diseases. The model should illustrate the underlying concept/ideas that will serve as the basis for replicating the final design. Best models will be evaluated and suitably awarded.

*Submit a write up (300 words) and upload a photograph (Less than 5 mb in .jpeg format) of the working model in the website under the contests tab.*

**Deadline: December 31, 2018**
