

Pursuing my fellowship in pediatric optometry at ESO-SN has given me a new learning experience. I really enjoyed studying the valuable concepts of pediatric optometry and vision therapy.

ESO-SN offers a great program for those who are willing to work hard and put in the time to achieve success. They provide excellent platform, favorable atmosphere for those who are self motivated. The mentors and all floor optometrist were very supportive, inspiring and polite. Consultant, fellow ophthalmologist was helpful through every single step. I found there was a good interaction between coordinator and student.

Weekly CME, SIG, pediatric optometry class and binocular vision class were very informative and interactive. I enjoyed attending all classes. Initially I also attended some continuous optometric education program on different optometric topics. The ESO-SN education system is dynamic and it makes you to think out of the box. Finally you become wiser and sharper

I have got many friends here that I will treasure many pleasant memories of them.

It has been a great experience and I will certainly recommend to my optometry friends.

I am proud to be associated with Elite school of optometry and Sankara Nethralaya

I am especially thankful to KK Sir, MS ma'am, Rizwana Ma'am and Revathy ma'am for their valuable guidance, encouragement throughout the fellowship and patiently taking me through it.

Thank you so much!
